

INVENTORS NAMES

Correction and record update regarding inventors' names of the present application is respectfully requested.

The name of the second inventor was omitted in the last communications from the USPTO. The second inventor's name is: Moshe Shadmon. A copy of previously submitted Declaration for Utility Patent Application is enclosed as a reference.

REMARKS

Examination and allowance of the present application is respectfully requested.

In view of the International Search Report that disclosed prior art that was unknown to the applicants at the time of PCT filing, the applicants have amended the claims for the National Stage filing (International Application No. PCT/US04/10951).

The scope of the claims has been reduced with lesser emphasis on utility and concentrated in the areas of perceived novel features of methods and systems that have not been discovered in prior art.

Claims 1, 6-8, 43-46, 53 and 75-79 stand as originally filed. Claims 5, 9, 42, and 80 were amended. Deleted are claims 2-4, 10-41, 47-52, 54-74, and 81-86.

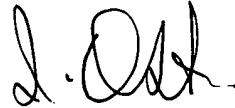

The remaining claims total 18. Three of the claims are independent and two of the claims are each dual dependent. Regretfully, these amendments to the claims were submitted in the original National Stage without following the appropriate format and procedures.

In view of the current amendment, applicants submit that it is no longer necessary to submit fees beyond the fees submitted with the original application.

Applicants also submit a second inventors name that was omitted from the USPTO process of the application.

If there should be any questions concerning this application, the Examiner is requested to contact the undersigned at the telephone number listed below.

Respectfully submitted,
Josef Osterweil
